If the customer does not notify the Telephone Company in writing at least 30 days prior to the end of the current Plan Year, the Telephone Company will automatically convert the customer's committed ETS service elements provided under the ETS ERO to the non-stabilized, undiscounted monthly rates specified in Sections 17.4.8(C) (1) through (C) (6), following, beginning the day after the current Plan Year ends. An Access Order Charge will not apply when a customer at the end of the current Plan Year subscribes to a new ETS ERO, a new ETS Term Discount Plan, new individual ETS Port Term Discount Plans or is converted to month-to-month billing using the non-stabilized, undiscounted monthly rates and nonrecurring charges specified in Sections 17.4.8(C) (1) through (C) (6), following.

16. Public Packet Data Network (Cont'd)16.3 Ethernet Transport Service (Cont'd)16.3.9 ETS Rural Health Care-Rate Option(B) General

The ETS Rural Health Care-Rate Option(ETS RHC-RO) is a specialized pricing plan available to eligible rural health care provider customers to support the need for broadband connectivity for telehealth/telemedicine applications in rural areas.

The ETS RHC-RO is available for subscription only from those Telephone Companies listed in Section 17.4.8(C)(13), following, during the defined Plan Year. The ETS RHC-RO provides Telephone Company specific stabilized, discounted monthly rates on committed ETS service elements provided to a qualified eligible rural health care provider during the defined Plan Year. The ETS RHC-RO Telephone Company specific stabilized, discounted monthly rates specified in Section 17.4.8(C)(13), following, apply in lieu of the non-stabilized monthly rates specified in Sections 17.4.8(C)(1) through (C)(6), following. When a customer subscribes to an available ETS RHC-RO, the Telephone Company specific stabilized, discounted monthly rates for the ETS service elements included under the ETS RHC-RO will not be subject to any Telephone Company initiated rate increases and decreases for the duration of the defined Plan Year. Nonrecurring charges are not rate stabilized under the ETS RHC-RO.

To subscribe to an available ETS RHC-RO, a customer must:

- be an eligible rural health care provider as defined in Title 47, Part 54, Subpart G, Sections 54.600 and 54.601, and
- have submitted FCC Forms 461 (Healthcare Connect Fund Program) and/or 465 (Telecommunications Program) to the Universal Service Administrative Company's (USAC's) website requesting Category One data transmission services and Internet access that can be satisfied using Ethernet Transport Services provided by the Telephone Company under Tariff No. 5.

Upon receipt of a customer's written request to subscribe to an available ETS RHC-RO, the Telephone Company will determine the customer's eligibility by verifying the rural health care provider's request for services on USAC's website (<http://www.usac.org>) for the defined Plan Year.

An Access Order Charge as described in Section 5.4.1, preceding, does not apply to the initial subscription of an available ETS RHC-RO.

The ETS service elements, including optional features, available for installation within the Telephone Company's serving territory at eligible rural health care provider locations (as defined in Title 47, Part 54, Subpart G, Section 54.600) are specified in Section 17.4.8(C) (13), following, for the defined Plan Year. ETS service element descriptions are identified in Section 16.3.4, preceding.

At any time during the defined Plan Year, the customer may: (1) order the installation of new committed ETS service elements and/or (2) request in-service ETS service elements be committed to the ETS RHC-RO to take advantage of the ETS RHC-RO stabilized, discounted monthly rates. When a customer commits new ETS service elements during the course of the defined Plan Year, an Access Order Charge and nonrecurring charges will apply for the newly installed service elements. Any ETS service element included in the customer's ETS RHC-RO must remain in-service from the time it is placed under the ETS RHC-RO through the end of the defined Plan Year. Any committed ETS service element disconnected during the defined Plan Year will be subject to a discontinuance charge. The discontinuance charge will be equal to 20% of the ETS RHC-RO Telephone Company specific stabilized, discounted monthly rate under the ETS RHC-RO and not the Telephone Company standard monthly rate for each disconnected ETS service element for each month remaining in the defined Plan Year. Should a customer disconnect all of its committed ETS service elements, effectively terminating its subscription to the ETS RHC-RO, it will not be permitted to re-subscribe to the ETS RHC-RO during the same defined Plan Year.

A customer may replace an existing ETS RHC-RO at any time during the current Plan Year with a new ETS RHC-RO for the following Plan Year, if one is available, without the application of discontinuance charges provided all the committed ETS service elements under the existing ETS RHC-RO are transferred to the new ETS RHC-RO. ## ACCESS SERVICE

16. Public Packet Data Network (Cont'd)16.4 Internet Protocol Gateway Access Service16.4.1 General

(M)

Internet Protocol Gateway Access Service (IPG) is an optional two-way packet transport service that provides an end-to-end transmission path using packet technology at transport speeds of either 1.544 Mbps or 44.736 Mbps, where available. IPG enables the customer to interconnect its Internet Protocol (IP) based network with the Telephone Company's switched network at a Telephone Company provided IP gateway. IPG is only available to connect the customer's designated premises (CDP) to a Telephone Company provided IP gateway serving wire center (IPG SWC) when both the CDP and IPG SWC are located within the Telephone Company's serving territory.

IPG provides the customer with voice transmission and call set up signaling paths between its CDP and the IPG SWC. Available for use in conjunction with Feature Group D (FGD) Switched Access Service as described in Section 6.8.1, preceding, IPG provides the customer with the ability to deliver interexchange voice traffic originated on or transported across its IP based network for termination to the Telephone Company's local exchange service subscribers and to accept interexchange voice traffic originated on or transported across the Telephone Company's network.

16.4.2 Service Description

As described below, IPG is provided using a combination of IPG Transport and IPG Ports. IPG can only be used in conjunction with FGD Switched Access Service, which is ordered separately by the IPG customer.

## ACCESS SERVICE

16. Public Packet Data Network (Cont'd)16.4 Internet Protocol Gateway Access Service (Cont'd)16.4.2 Service Description (Cont'd)

(M)

IPG Transport is required to provide the connection between the CDP and Telephone Company IPG SWC. IPG Transport consists of an IPG Transport Termination and, where required, an IPG Transport Mileage Facility and IPG Transport Mileage Termination. Which IPG Transport rate elements apply will depend on where in its network the Telephone Company deploys its IP gateway. An IPG Port is required to provide the interface at the IPG SWC to the Telephone Company's switched network.

The transmission quality of IPG is not guaranteed and is offered to the IPG customer at a best effort level. The Telephone Company will attempt to deliver all interexchange voice traffic received that was originated on or transported across the IPG customer's IP based network.

The Telephone Company will provide the IPG customer accurate call signaling data for interexchange voice traffic that originates on or is transported across the Telephone Company's network. The call signaling data will either: 1) conform to an active 10-digit North American Numbering Plan or directory number, which is associated with the geographic location of the originating calling party (i.e., Calling Party Number and/or Automatic Number Identification) or 2) represent IP equivalent call signaling that is mutually agreed upon by the IPG customer and Telephone Company at the time the customer places its order for IPG.

Service is provided, where available, between CDPs and designated Telephone Company IPG SWCs located within the Telephone Company's serving territory. IPG will be furnished where suitable facilities exist as determined by the Telephone Company. The Telephone Company will identify its IPG SWCs in the NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. NO. 4.

(A) Rate Categories

IPG service elements are described below. Rates and charges are specified in Section 17.4.8(D), following. The Telephone Company specific rate band assignment for all IPG service elements is specified in the Special Access (SPA) column in Section 17.5.1, following.

(1) IPG Transport Termination (TT)

An IPG TT provides the transport facility between the customer's designated premises and the Telephone Company's SWC. The IPG TT rate element is designed to recover the costs associated with this transport facility.

IPG TTs are available at bandwidth speeds of 1.544 Mbps and 44.736 Mbps. The IPG customer orders the quantity and type of IPG TT it needs based on its bandwidth requirements. An IPG TT may be connected to: 1) an IPG Port when the IPG SWC is the SWC serving the customer's designated premises or 2) an IPG Transport Mileage Facility and IPG Transport Mileage Termination when the SWC serving the customer's designated premises is not IPG equipped.

Monthly and nonrecurring charges apply for each IPG TT ordered. The charges are based upon the bandwidth capacity ordered by the customer. The IPG TT will apply even if the customer's designated premises and the IPG SWC are located in the same Telephone Company building.

IPG TMF is required when the SWC serving the customer's designated premises is not IPG equipped. The IPG TMF provides the transport facility between the SWC serving the customer's designated premises and the Telephone Company's IPG SWC. The IPG TMF rate element is designed to recover the costs associated with this transport facility.

IPG TMF is available at bandwidth speeds of 1.544 Mbps and 44.736 Mbps. The IPG customer orders the quantity and type of IPG TMF it needs based on its bandwidth requirements.

A monthly charge applies for each IPG TMF ordered. The monthly charge for each IPG TMF is based upon the bandwidth speed ordered and the number of airline miles between the SWC serving the customer's designated premises and the Telephone Company's IPG SWC. To determine the applicable monthly charge, first compute the airline mileage using the V&H coordinates method described in the NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. NO. 4. When the calculation results in a fraction of a mile, always round up to the next whole mile before determining the total airline mileage. Once the total airline mileage for each IPG TMF is determined, multiply the number of airline miles times the IPG Transport Mileage Facility per mile rate for the bandwidth speed ordered.

## ACCESS SERVICE

16. Public Packet Data Network (Cont'd)16.4 Internet Protocol Gateway Access Service (Cont'd)16.4.4 Rate Regulations (Cont'd)(A) Rate Categories (Cont'd)(4) IPG Port

An IPG Port provides network and signaling interfaces at the Telephone Company's IPG SWC. The IPG Port also provides for the establishment of a trunk-side bearer channel transmission path to allow voice call information to be passed between the customer's IP based network and the Telephone Company's switched network. The IPG Port rate element is designed to recover the costs associated with providing the interface for the bearer channel transmission path.

IPG Ports are available with bandwidth speeds of 1.544 Mbps and 44.736 Mbps. Required IPG Transport into the IPG Port is provided using either: 1) an IPG TT when the SWC serving the customer's designated premises is IPG equipped or 2) a combination of an IPG TT, an IPG TMF and an IPG TMT when the SWC serving the customer's designated premises is not IPG equipped. The bandwidth speed of an IPG Port must be equal to the bandwidth speed of the associated IPG Transport.

A monthly charge applies for each IPG Port ordered. The monthly charge for each IPG Port is based upon the bandwidth speed ordered by the customer.

## ACCESS SERVICE

16. Public Packet Data Network (Cont'd)16.4 Internet Protocol Gateway Access Service (Cont'd)16.4.4 Rate Regulations (Cont'd)(B) Types of Rates and Charges

There are two types of rates and charges applicable to IPG. They are monthly rates and nonrecurring charges as described below.

(1) Monthly Rates

Monthly rates are recurring rates that apply each month or fraction thereof when an IPG service element is provided. For billing purposes, each month is considered to have 30 days.

(2) Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for specific work activity (i.e., installation or change to an existing service). The types of nonrecurring charges that apply for IPG are installation of service, service rearrangements and moves.

Except as specified below, these charges are in addition to the Access Order Charge as specified in Section 17.4.1, following.

(a) Installation of Service

Nonrecurring charges apply for the installation of IPG Transport Terminations.

16. Public Packet Data Network (Cont'd)16.4 Internet Protocol Gateway Access Service (Cont'd)16.4.4 Rate Regulations (Cont'd)(B) Types of Rates and Charges (Cont'd)(2) Nonrecurring Charges (Cont'd)(b) Service Rearrangements

Service rearrangements are changes to existing (i.e., installed) services, which may be administrative only in nature as set forth below or, that involve an actual physical change to the service.

When the IPG customer elects to change the bandwidth capacity on existing IPG Ports and associated IPG Transport, the request will be considered a discontinuance of service for the former capacity and start of service for the new capacity. Associated nonrecurring (i.e., installation) charges will apply. New minimum period requirements will be established for the new IPG service elements. The IPG customer will also remain responsible for satisfying all outstanding minimum period charges for the discontinued IPG service elements, if applicable.

Following the initial installation of service, the IPG customer may request a change to its existing signaling interface and/or bearer channel format provided the requested signaling interface and/or bearer channel format conforms to the transmission standards specified in the Technical References listed in Section 16.4.3(B), above. Telephone Company and IPG customer will work cooperatively to ensure that proper call addressing and billing information will continue to be exchanged as described in Section 16.4.3(C), above, after the requested change is made. An Access Order Charge per order will apply for this type of request.

Administrative changes will be made without charge(s) to the IPG customer. Administrative changes are as follows:

- Change of customer name,
- Change of customer or customer's end user premises address when the change of address is not a result of physical relocation of equipment,
- Change in billing data (name, address, or contact name or telephone number),
- Change of agency authorization,
- Change of customer circuit identification,
- Change of billing account number,
- Change of customer or customer's end user contact name or telephone number, and

16. Public Packet Data Network (Cont'd)16.4 Internet Protocol Gateway Access Service (Cont'd)16.4.4 (B) Types of Rates and Charges (Cont'd)(2) Nonrecurring Charges (Cont'd)(c) Moves

A move involves a change in the physical location of one of the following:

- The Point of Termination at the customer's premises
- The customer's premises

The charges for moving IPG service elements are dependent on whether the move is to a different location within the same building, to a different building within the same SWC, or to a different building in a different SWC.

(i) Moves Within the Same Building

IPG Ports and, where required, IPG TMFs and IPG TMTs are not impacted when the IPG customer moves its Point of Termination to a different location within the same building. The charge for moving an IPG TT to a new location within the same building will be an amount equal to one half of the nonrecurring (i.e., installation) charge for the IPG TT. There will be no change in the minimum period requirements.

\* This charge is generally billed to the end user who is the subscriber to the Telephone Exchange Service. In those instances where the IC both requests the PIC change, and requests the associated charge be billed to it, the Telephone Company will bill the IC. In the event the subscriber is incorrectly presubscribed due to misassignment on the part of the Telephone Company, no charge shall apply. In the event the subscriber denies requesting a PIC change, the Telephone Company will credit the subscriber's account for the PIC Change Charge associated with the alleged unauthorized change, if such charge was billed to the subscriber. The Telephone Company will then bill the IC responsible for the alleged unauthorized change a PIC Change Charge to return the subscriber to its previous authorized carrier and, if initially billed to the subscriber, the PIC Change Charge for the alleged unauthorized change.
